

PROJECT NEXT GENERATION

PROJECT NEXT GENERATION

Project Next Generation is all about the legacy that Adventure Base is leaving behind in the local communities. The primary focus will be on the younger generation of adventurers, something we are all very keen on.

As a team we are also keen to invest into other next generation projects such as the improvement to mountain facilities, better education around the impacts of climate change and many other social initiatives.

Project Next Generation is very much a future project for Adventure Base, with the primary focus currently being on achieving Net-Zero and being a certified B-Corp. We will of course keep you updated with our plans as they progress.

We are always open to ideas so please get in touch if you have a project or any thoughts on the scheme.
